

Adani Green Energy Paid Internship Summer Opportunities For Recent Graduates

Description

Adani Green Energy is seeking a dynamic and experienced Renewable Energy Project Manager to lead and oversee our renewable energy projects across India. As a leader in the sustainable energy sector, Adani Green Energy is committed to driving the transition to a greener and more sustainable future. The Project Manager will play a crucial role in achieving this mission by managing and executing renewable energy projects efficiently and effectively.

Responsibilities

1. **Project Planning:** Develop comprehensive project plans, including scope, budget, timeline, and resource allocation.
2. **Project Execution:** Manage all aspects of renewable energy projects, ensuring they are delivered on time and within budget.
3. **Stakeholder Engagement:** Collaborate with internal teams, contractors, and regulatory bodies to ensure project compliance and success.
4. **Risk Management:** Identify potential risks and develop mitigation strategies to minimize project disruptions.
5. **Quality Assurance:** Maintain high-quality standards throughout project development, construction, and commissioning phases.
6. **Financial Management:** Monitor project finances, track expenses, and report on project financial performance.
7. **Environmental Compliance:** Ensure projects adhere to environmental regulations and sustainability goals.
8. **Team Leadership:** Lead and motivate project teams, fostering a culture of excellence and innovation.

Qualifications

- Bachelor's degree in engineering, renewable energy, or related field (Master's degree preferred).
- Proven experience in managing renewable energy projects, with at least 5 years in a leadership role.
- Strong knowledge of renewable energy technologies and industry trends.
- Excellent project management skills, including the ability to manage multiple projects simultaneously.
- Exceptional communication and interpersonal skills.
- Knowledge of environmental regulations and sustainability standards.
- PMP or relevant project management certification is a plus.

Experience

- 5+ years of experience in renewable energy project management.
- Demonstrated success in delivering renewable energy projects on time and within budget.
- Experience working with cross-functional teams and external stakeholders.
- Proven track record of managing large-scale renewable energy projects.
