

Anglo American plc Summer Internship Opportunities For Students

Description

Anglo American plc is seeking a highly skilled and experienced Senior Mining Engineer to join our dynamic team. As a Senior Mining Engineer, you will play a crucial role in the planning, design, and optimization of mining operations. You will be responsible for overseeing various aspects of mining projects, ensuring safety standards, and driving operational excellence.

Responsibilities

1. Mining Operations Management:

- Lead and manage mining operations to ensure efficiency, safety, and adherence to environmental standards.
- Develop and implement mining plans, designs, and strategies for optimal resource extraction.

2. Project Planning and Execution:

- Collaborate with cross-functional teams to plan and execute mining projects within budget and timelines.
- Conduct feasibility studies and risk assessments for new mining ventures.

3. Safety and Compliance:

- Uphold and enforce safety protocols and regulations to ensure a secure working environment.
- Monitor compliance with local and international mining laws and standards.

4. Technical Expertise:

- Provide technical expertise in mine planning, geotechnical engineering, and ore reserve estimation.
- Utilize advanced software tools for mine design and modeling.

Qualifications

- Bachelor's degree in Mining Engineering or a related field.
- Professional Engineer (P.Eng) or equivalent certification.
- Advanced degree (Master's or PhD) in Mining Engineering is a plus.

Experience

- Minimum of 8 years of experience in mining engineering with a proven track record in project management.
- Extensive experience in open-pit and underground mining operations.

Skills

1. Technical Skills:

- Proficiency in mine design and planning software (e.g., Surpac, MineSight).
- Strong analytical and problem-solving skills.
