

Rio Tinto Group Internship Program For Recent graduates

Description

We are seeking a Senior Mining Engineer to join our team at Rio Tinto Group, a leading global mining and metals company. In this role, you will play a crucial part in optimizing our mining operations, ensuring safety, efficiency, and sustainability. You will collaborate with cross-functional teams and leverage cutting-edge technology to drive innovation in mining practices.

Responsibilities

1. **Mining Planning:** Develop and implement mining plans that optimize ore extraction, waste management, and resource utilization.
2. **Safety and Compliance:** Ensure mining operations adhere to safety standards, environmental regulations, and company policies.
3. **Technical Analysis:** Conduct geological assessments, ore reserve calculations, and production forecasting to support business decisions.
4. **Cost Management:** Monitor and control mining costs while maximizing operational efficiency.
5. **Equipment Utilization:** Collaborate with maintenance teams to ensure mining equipment is in optimal working condition.
6. **Environmental Stewardship:** Promote sustainable mining practices and contribute to environmental impact assessments.
7. **Team Leadership:** Provide guidance and mentorship to junior mining engineers and technicians.
8. **Stakeholder Engagement:** Collaborate with government agencies, local communities, and other stakeholders to build positive relationships.

Qualifications

- Bachelor's degree in Mining Engineering or related field (Master's preferred).
- Professional Engineer (PE) certification preferred.
- Minimum of 5 years of experience in mining engineering.
- Proficiency in mining software (e.g., Surpac, Vulcan, MineSight).
- Strong understanding of safety and environmental regulations.
- Excellent communication and interpersonal skills.
- Demonstrated leadership and project management abilities.

Experience

- 5+ years of experience in open-pit or underground mining operations.
- Proven track record in mining project management.
- Experience with resource estimation, mine design, and production scheduling.
- Familiarity with continuous improvement methodologies (e.g., Six Sigma, Lean).
